Manchineel trees are mainly found on the Spring Bay and Giles Quarter trails:

# Trail Etiquette & Park Rules

## **Plan Ahead and Prepare**

- Before starting your hike, please inform the SCF Office (+599 416 3295 or send an email to [info@sabapark.org](mailto:info@sabapark.org)). Let a friend or somebody at your hotel know your hiking plan. Cell phones won't have reception in most areas of the park, especially the north coast.
- Always bring plenty of water and use a hiking stick (especially useful downhill).
- On the hot, open trails, also wear a hat or a cap. Long-sleeved shirts and long pants are recommended. Use sunblock.
- Wear good hiking shoes that provide ankle protection. Many trails have wet, muddy parts, even during the dry season. Hence, slippers or sandals are not recommended.

## **Dispose of Waste Properly**

- Pack it in, pack it out. Whatever is brought into the park, should be taken out of the park.
- Help protect nature by taking a bag with you on any trip and simply collect any litter you come across. It's one thing to leave the park as you find it, but how much better to leave it ever so slightly cleaner?
- Dog owners must pick up after pets.

## **Leave What You Find**

- Preserve the past: examine, but do not touch, cultural or historic structures and artifacts.
- Leave rocks, plants and other natural objects as you find them.
- Avoid introducing or transporting non-native species.

## **Respect Wildlife**

- Observe wildlife from a distance. Do not follow or approach them.
- The endangered endemic [Red-bellied Racer](#) snake (*Alsophis rufiventris*) is very shy, sensitive to sound and completely harmless to humans.
- Never feed animals. Feeding wildlife damages their health, alters natural behaviors, and exposes them to predators and other dangers.
- Avoid wildlife during sensitive times: mating, nesting or raising young.
- Please leave all plants and flowers for others to enjoy.
- Pets must be on a leash at all times.

## **Be Considerate of Others**

- Stay on the designated trails; most trails pass through private lands. Do not cut switchbacks or take shortcuts. Respect the rights of the landowners. Camping is not allowed.
- Respect other visitors and protect the quality of their experience.
- Be courteous. Yield to other users on the trail. If you're descending a steep trail and you see hikers coming up, step off the path to let them pass. Since gaining elevation requires more energy than going down, it's polite to give way to the person burning more calories. Keep to the right side of the trail when you are being passed.
- Step to the downhill side of the trail when encountering pack stock.
- Let nature's sounds prevail. Avoid loud voices and noises.

## **Be Aware**

- During the early summer months when grass, weeds, and other vegetation are heaviest, Chigger mites can cause an itchy rash (see separate advisory).
- **Beware of Jackies** ([Jack Spaniard - Polistes lanio](#)). The wasp stings can be very painful and people who are allergic to bee stings should carry an [EpiPen](#) (available at the local hospital).
- The flying of UAVs (drones) is not permitted in the Mount Scenery Park without express permission from the relevant authorities.
